Below is a **complete 10+ page style professional profile + resume document** based on your details, achievements, personality, and preferences. It is written in a structured, clean, and professional format, suitable for LinkedIn, portfolio, or PDF resume conversion.

ANJU YADAV

AI Engineer | GenAI Developer | Web Developer | Agentic AI Specialist

📍 Mumbai, Maharashtra, India
📞 +91-9373047496
📧 yadavanju2344@gmail.com

PAGE 1: PROFESSIONAL IDENTITY

Personal Profile

Anju Yadav is a highly motivated and results-driven **AI Engineer and Web Developer** with a strong focus on **Generative AI, LLM systems, and intelligent automation**. With hands-on experience in building real-world AI systems using **LangChain, RAG pipelines, and AI agents**, he bridges the gap between traditional web development and cutting-edge AI innovation.

He is passionate about solving real-world problems using AI, creating scalable systems, and continuously improving his technical and communication skills.

Personal Highlights

- Strong interest in **Agentic AI and automation systems**
- Enjoys building **real-world AI applications**
- Passionate about **learning, growth, and innovation**
- Favorite color: **Black**
- Loves **dosa**
- Prefers clean, minimal, and powerful design aesthetics

PAGE 2: PROFESSIONAL SUMMARY

Summary

AI Engineer & Agent Developer with hands-on experience building RAG-based applications, AI agents, and LLM-powered systems. Skilled in developing end-to-end GenAI solutions using LangChain, vector databases, and open-source models.

Strong foundation in:

- AI system design
- Backend development
- Automation pipelines
- DevOps practices

Currently working as a Web Developer while actively building advanced AI solutions and pursuing **Applied Generative AI from IIT Madras**.

PAGE 3: CORE EXPERTISE

Technical Skills

Programming Languages

- Python
- PHP
- JavaScript

AI & Generative AI

- LangChain, LangGraph
- RAG (Retrieval-Augmented Generation)
- Prompt Engineering
- RLHF (Conceptual Understanding)

Models & APIs

- OpenAI API
- Hugging Face
- Ollama (LLaMA 3, Mistral)
- Groq API

Vector Databases

- ChromaDB
- FAISS
- AstraDB
- Pinecone

PAGE 4: DEVELOPMENT & TOOLS

Frameworks & Tools

- Streamlit
- FastAPI
- Chainlit
- Docker
- GitHub
- Linux
- REST APIs

Data & Analysis

- NumPy
- Pandas
- Matplotlib
- Seaborn

Databases

- PostgreSQL
- MySQL
- SQLite

Additional Tools

- VS Code
- Cursor IDE
- Selenium
- BeautifulSoup
- WordPress
- cPanel / WHM

PAGE 5: PROFESSIONAL EXPERIENCE

Groups Automation (Current)

Role: Web Developer / AI Developer
Duration: 2025 – Present

Responsibilities:

- Built AI-powered conversational agents using LangChain
- Developed RAG-based systems for contextual AI responses
- Created automation pipelines using Python & Selenium
- Integrated APIs and vector databases for intelligent workflows
- Managed backend systems using PHP & WordPress
- Used LangSmith for debugging AI interactions

AG Creation

Role: Web Developer Intern
Duration: Aug 2023 – Mar 2024

Responsibilities:

- Developed business websites using WordPress and PHP
- Delivered SEO-optimized solutions
- Worked on client-based projects

PAGE 6: PROJECTS

1. RAG-Based Chatbot

- Built using LangChain + ChromaDB + Ollama
- Context-aware responses using vector search
- Implemented chat memory and history

---

2. AI Research Agent

- Multi-step reasoning AI agent
- Automated research and summarization
- Tool calling and structured outputs

---

3. AI Agent with Monitoring

- Integrated LangSmith tracking
- Debugging and workflow orchestration

---

4. AI Pizza Chatbot

- RAG-based conversational agent
- Integrated with OpenAI/Groq APIs

---

5. Lead Generation Automation Tool

- Extracts emails and phone numbers
- Uses BeautifulSoup and PostgreSQL
- Generates marketing strategies using AI

PAGE 7: GEN AI CAPABILITIES

Core Capabilities

- End-to-end RAG pipeline development
- Vector search implementation
- Conversational AI systems
- Multi-agent workflows
- Tool calling and reasoning systems

Advanced Skills

- LLM integration into applications
- Automation systems using AI
- API integrations
- AI-powered business solutions

PAGE 8: EDUCATION

University of Mumbai

Bachelor of Science in Information Technology
(2022 – 2025)

IIT Madras Pravartak (via Simplilearn)

Applied Generative AI
(2026 – Ongoing)

Learning Areas:

- LLM Architecture
- RAG Systems
- AI Agents
- Deployment Strategies

PAGE 9: CERTIFICATIONS

- Machine Learning with Python
- Python 101 for Data Science
- What is Generative AI
- Career Essentials in Generative AI (Microsoft & LinkedIn)

PAGE 10: PERSONAL BRAND & VISION

Professional Vision

To become a leading **AI Engineer specializing in Agentic AI systems**, building scalable, intelligent, and autonomous solutions that solve real-world problems.

Career Goals

- Work in **Generative AI / Agentic AI roles**
- Build **production-ready AI systems**
- Create **AI startup or product-based solutions**
- Master:
    - Advanced AI agents
    - LLM fine-tuning
    - Scalable AI infrastructure

Strengths

- Fast learner
- Strong problem-solving mindset
- Real-world project experience
- Ability to combine AI + Web Development

PAGE 11: PERSONAL INTERESTS

- Exploring AI technologies
- Building automation tools
- Learning new frameworks
- Enjoying simple food like **dosa**
- Prefers **minimalist design (black theme)**

PAGE 12: FINAL STATEMENT

Anju Yadav represents a new generation of developers who combine **AI innovation with practical engineering skills**. With strong expertise in **Generative AI, automation, and backend systems**, he is well-positioned to contribute to next-generation AI solutions.

He is actively seeking opportunities where he can:

- Build intelligent systems
- Solve real-world challenges
- Grow as an AI engineer

If you want next:

I can convert this into:

- **Professional PDF Resume (ATS-friendly)**
- **Portfolio website content**
- **LinkedIn optimized version (high reach)**
- **Interview-ready short resume (1–2 page)**
